DUTCH ECONOMY HOLDING UP...

- International, highly competitive economy
- Solid housing price development

... BUT INTERNATIONAL UNCERTAINTY CONTINUES ...

- The UK's post-Brexit transition period
- Corona virus outbreak and its impact on the global economy and stock markets

WITH FUNDAMENTAL CHANGES IN KEY DRIVERS

- Interest rate environment: low-for-longer
- Turn of the (economic) cycle
- Higher regulatory requirements related to license to operate

¹ Real GDP growth in percentage, y-o-y. Sources: Dutch Statistics Office (NL) ; German Federal Statistics Office (GE)

ADAPTING TO A LOW-FOR-LONGER ENVIRONMENT

Optimising the balance sheet

HISTORIC INFLATION FORWARD & SWAP RATE

OPTIMISED FUNDING MIX

COMMENTS

- Funding mix has been optimised, decreasing average cost-of-funds
- Increased focus on originate-to-manage for retail as well as corporate lending business
- Focus own book on shorter maturities compared to focus on longer maturities for originate-to-manage origination
- Increased investment portfolio by 41% due to revaluations and several new investments

TURN OF THE ECONOMIC CYCLE

Continued rebalancing of our portfolios towards more resilience

PROFIT AFTER TAX AND RETURN ON EQUITY

COMMENTS

- Profitability was strong in 2019, with a profit after tax attributable to shareholders of EUR 194 million
- Excluding non-recurring items, net profit increased by 16% from EUR 173 million to EUR 201 million
- Return on equity of 11.4% (2018: 13.6%) is impacted by to the higher equity base at 1 January 2019 by EUR 106 million
- Excluding non-recurring items return on equity increased from 10.8% to 11.8% in 2019
- Net interest income excluding the IFRS 9 impact of EUR 34 million in 2019 (2018: approxim. EUR 50 million) increased by 4%, mainly reflecting improved funding expenses
- Operating expenses decreased slightly by 1% in 2019. In 2018 operating expenses were impacted by the IPO related costs of EUR 8 million. In 2019 IT transition, project costs and reorganization of Markets (EUR 9 million) were included

PORTFOLIO VOLUMES AND SPREADS

Continued successful rebalancing of the portfolios at healthy spreads

CORPORATE LOAN SPREADS & VOLUMES

RETAIL ASSET SPREADS & VOLUMES

COMMENTS

- Corporate client assets:
 - Corporate client assets for our own book remained stable to EUR 9.9 bn, reflecting the ongoing rebalancing of our portfolios:
 - The cyclical leveraged finance, shipping and energy portfolios decreased by EUR 0.8 bn
 - The more granular receivables finance and lease portfolios increased by EUR 0.4 bn
 - The average portfolio spread decreased to 2.70%, mainly driven by a further decrease of the average origination spread to 2.52%, reflecting the rebalancing of the portfolios
 - Beequip portfolio grew from EUR 0.4 billion to EUR 0.5 billion with portfolio spread of around 5%
- Retail client assets:
 - The own book portfolio of mortgage loans increased in 2019 by 6% to EUR 9.8 billion
 - The average portfolio spread decreased to 2.30%, even though origination spreads improved

Note: 2017 figures include Vijlma. Spreads reflect spreads above the 3 month euribor base rate

NET INTEREST INCOME

Further improvement of net interest margin

NET INTEREST INCOME

(EUR million)

NET INTEREST MARGIN & FUNDING SPREAD

COMMENTS

- Excluding the IFRS 9 impact of EUR 34 million in 2019 and EUR 50 million in 2018, net interest income increased by 4% and the net interest margin from 1.84% to 1.89%
- The further reduction of the effective funding spread from 0.73% in 2018 to 0.71% in 2019 was the main driver behind the improvement

Note: 2017 figures exclude Vijlma

NET FEE AND COMMISSION INCOME

Investments in new fee generating products are paying off

NET FEE AND COMMISSION INCOME

(EUR million)

COMMENTS

- The end of 2018 was marked by the sale and exits of a significant part of our fund investments with strong 2018 performance fees (EUR 8 million), consequently lower investment management fees are accounted for in 2019
- Our strategy of the Originate-to-Manage mortgages is also reflected in fee income:
 - As owner occupied mortgage loans under management continued to grow, displaying an increase of 79% in 2019, driving the Originate-to-Manage fees increasing from EUR 11 million in 2018 to EUR 15 million in 2019
 - Lending related fees remained stable in 2019 at EUR 10 million
 - M&A fees declined in 2019 to EUR 4 million (2018: EUR 11 million) with 2018 displaying exceptionally high fees related to the HSH transaction (2018: EUR 7 million)

INVESTMENT INCOME

Strong performance on a more client focused portfolio

Real estate investments	15	5%	11	5%
Other	1	<1%	3	2%
Total:	303	100%	215	100%

COMMENTS

- Investment income is sensitive to the sentiment in the equity markets and can therefore be volatile year on year
- Investment income remained at an elevated level in 2019 of EUR 60 million (FY 2018: EUR 74 million) for the third consecutive year
- The equity investment portfolio increased by 41% in 2019 to EUR 303 million, driven by new investments in fintech companies and revaluations
- The increase in direct investments is mainly driven by 2 new investments of EUR 18 million and revaluations of EUR 22 million
- A substantial part of the increase in strategic investments relates to the revaluation of Ebury
- Investments in JCF related funds, including our investment in HSH total approximately EUR 40m

OPERATING EXPENSES

Fully loaded cost/income ratio absorbing regulatory expenses

EVOLUTION OF OPERATING EXPENSES

COST/INCOME RATIO

COMMENTS

- Operating expenses decreased slightly by 1% in 2019, mainly driven by the following:
 - 2018 expenses include expenses related to the IPO (EUR 8 million)
 - 2019 expenses related to the completion of several milestones in our IT re-transition program are lower than in 2018
 - Furthermore continuous investments were made in 2019 in regulatory projects, (e.g. project Care, KYC BTL, remediation IMI) and in our new ventures
 - Finally, higher personnel expenses stem from structural changes (higher FTEs, mainly because of the expansion of Beequip) and conjunctural (one-off provision for severance payments linked to discontinuation of market activities)
- Total costs related to the license to operate are estimated between EUR 27 - 32 million on an annual basis
- IT costs on an annual basis are in a range of EUR 40 to 45 million, including various projects and the outsourcing to Cegeka

CREDIT LOSS EXPENSE

Credit loss expense in 2019 improved slightly

LtV Dutch residential mortgage loans	68%	72%	75%
LtV BTL mortgage loans	52%	52%	57%

COMMENTS

- Credit loss expense in 2019 at EUR 49 million, 9% below the 2018 figure of EUR 54 million
- The overall development displays the improving average credit quality of the corporate loan portfolio and strong performance of the mortgage portfolio, which displayed a credit loss release in 2019 of EUR 4 million
- Some challenges remain in certain portfolios, especially with respect to Leveraged Finance and Energy
- 2019 displayed a strong improvement of the credit quality of NIBC's portfolios, which is further reflected in the development of the various asset quality ratios displayed in the graphs to the left
- The decreased cost of risk from 0.73% to 0.63% is driven by both a lower level of credit loss expense as well as higher level of RWAs from the 30% IMI regulatory add-on
- Excluding the well collateralised short term debt financing commitment to Reggeborgh top-20 exposures / CET 1 ratio would be 78%

¹) includes a commitment related to NIBC supporting Reggeborgh in the envisaged public offer for ValkerWessels. NIBC acted as a financial advisor to the shareholders of Reggeborgh and provided the debt financing in which Reggeborgh has the ability to draw down debt for an amount of EUR 200 million (EUR 75 million drawn as per 31 December 2019).

Cost of risk = credit loss expense divided by average RWAs

COMMENTS

- Continued solid funding profile, demonstrated by:
 - Diversified funding composition
 - Stable liquidity ratios at high levels of 222% (LCR) and 121% (NSFR)
- Wholesale transactions issued in 2019, supporting the funding profile:
 - a EUR 500 million 8-year public covered bond
 - a EUR 300 million 5-year public senior non-preferred bond
 - A EUR 500 million 6-year public senior preferred (senior unsecured) bond
 - A EUR 500 million 10-year public covered bond
 - EUR 375 million privately placed funding raised in different formats and maturities
- Retail savings increased by 6% with inflow in the Netherlands and Belgium. The on-demand portion of savings was actively managed up to 64%
- Funding transactions of EUR 1.5 billion that mature in 2020 include TLTRO of EUR 0.7 billion and a short-term floating rate note of EUR 350 million
- The weighted average tenor of our wholesale funding increased from 6.3 years to 6.6 years in 2019

CAPITAL

Strong solvency ratios

CET 1 DEVELOPMENT IN 2019

COMMENTS

- The fully loaded CET 1 ratio excluding non-eligible profit at the end of 2019 (including the impact from the final outcome of an internal model investigation (IMI) in 2019 by DNB) is 17.1%
- This is comfortably above both the required SREP-level of 10.5% applicable as of 2020 and our medium term objective of 14%
- The fully loaded CET 1 ratio of 17.1% also enables NIBC to be well prepared for Basel IV. We estimate an RWA impact of 15-25% assuming the current portfolio to be the same in 2027 and before mitigating actions
- Including a minimum floor on residential mortgages that DNB intent to implement in September 2020. The remaining RWA impact of Basel IV is expected to decrease to a range of 10 – 15%
- The CET 1 ratio of 17.1% will increase to 17.7% after the AGM has approved the 2019 financial statements and the proposed profit distribution
